#### 2: Sample List of Resources of Concern

#### 3: Discussion Questions

- How has GBERBA targeted practices in the past and are the high priority practices and resources being addressed currently?
- What are the priority water resources and land resources to be targeted?
- Is there local technical capacity to work with landowners to make changes on the landscape?
- What resources are needed from local citizens, local government, NGOs, and State and Federal agencies?
- What is GBERBA's strategy for working with Amendment funds over the next 22 years?
